

## How Wessels Heat Exchangers Keep Diagnostics Labs Functioning During COVID-19 Pandemic

UTAH - As an AHRI certified heat exchanger manufacturer, Wessels Company supplies heat exchangers to hospitals, clinics, and medical labs all over the world, including a leading diagnostic lab in Utah.

There are at least three different countries and over 17 different states within the United States that rely on Wessels Company heat exchangers within hospital or other medical environments. These heat exchangers are critical in keeping medical success rates high and patients comfortable.

During the 2020 COVID-19 pandemic, Wessels Company's heat exchangers will be instrumental in keeping several hospitals, medical clinics, and military installations around the world up and running regarding their HVAC needs. This allows medical professionals to function with little concern for outside factors, such as HVAC systems and air quality for their patients.

Because of the dependability of AHRI certified Wessels Company heat exchanger products, vital medical professionals, including testing labs, are already able to reliably test and return results to patients.
